Bread for the World is the globally active development and relief agency of the Protestant Churches in Germany. In more than 90 countries all across the globe they empower the poor and marginalised to improve their living conditions.

At the request of partner organisations of Bread for the World Dienste in Übersee searches and recruits experienced professionals to work in projects of the partners on the basis of a fixed-term contract. Through their active commitment the professionals show their solidarity with the people in the respective country.

The skills and experience of professionals are crucial for a sustainable development. In order to counteract the outflow of experts from developing and emerging countries, Bread for the World supports its partner organisations by offering a returning professionals programme so that the organisations benefit from the high-quality training and the excellent motivation of the returnees.
