Global Coalition for SOCIAL PROTECTION FLOORS

# Key demands for national and international action on universal social protection

Universal Social Protection: End Poverty and Reduce Inequality Side Event High-Level Political Forum Tuesday July 18<sup>th</sup> 2017

### Social protection for all

Key for poverty and inequality reduction, and to achieve the 2030 Agenda

### Adaptation to National Context: Implications of the 2030 Agenda for Argentina

- Social protection floors (ILO R20): Greatest challenges: Guarantee 1, 2 & 3
  → Higher unprotection for young and female households
- Link with SDGs: Focus on SDGs 1, 2, 3 and 5
  - Considered as social protection priorities for the Government's Goal "Zero Poverty", according to Argentina's Voluntary Report
  - All starred (\*) indicators are also considered by the Argentinian Government in the Voluntary Report

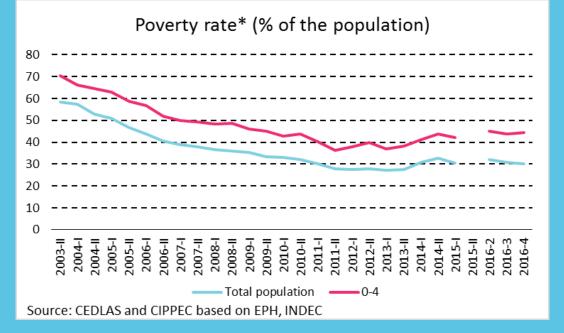

### Goal 1: End poverty in all its forms everywhere

# 32% of the population under the poverty line

#### Infantilisation of poverty

- Moderate\* and extreme poverty\* affect 42.3% and 9.4% of children under 5 years of age, respectively.
- 22.3% of children under 5 years of age live in households with at least one unsatisfied basic need (vs. 12.5% of total population).
- Significant regional disparities across the country.

### Goal 1: End poverty in all its forms everywhere

### **Existing social protection policies**

Conditional Cash Transfers: Universal Child Allowance and Universal Pregnancy Allowance, but:

- Lack of universal coverage\*
- Lowest children coverage in the poorest quintile
- Government social spending as a % of total spending remained constant

### **Proposal: universal income for families with children (Guarantee 2)**

Based on the current family allowances scheme:

- Universalization: Reach all children
- Make the system more progressive
- Increase cash transfer amounts

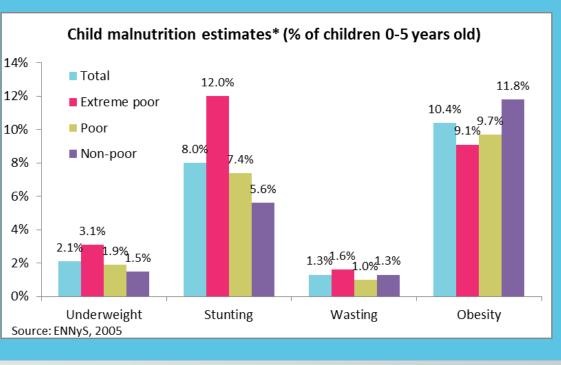

# Goal 2: End hunger, achieve food security and improved nutrition and promote sustainable agriculture

### Malnutrition as the greatest concern

- Obesity epidemic\* with lack of specific micro nutrients
- Severe food insecurity affects 4.5% of households and it has low incidence among children.

# Proposal: encourage healthy eating and physical activity

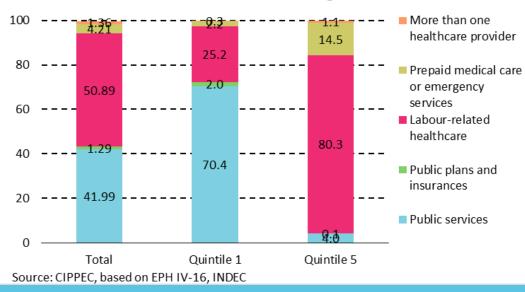

- Strategies to promote healthy food choices
- Industry regulations and incentives Encourage healthy habits
- Raise public awareness

CIPPEC®

## Goal 3: Ensure healthy lives and promote wellbeing for all at all ages Infant mortality\* reached

Healthcare coverage\*

Infant mortality\* reached an all-time low in 2015: 9.7 deaths per 1,000 births. Maternal mortality\*

- Outstanding debt: unmet MDG **Sexual and reproductive health**
- Teenage fertility rate\* constant and 67% unintended\*

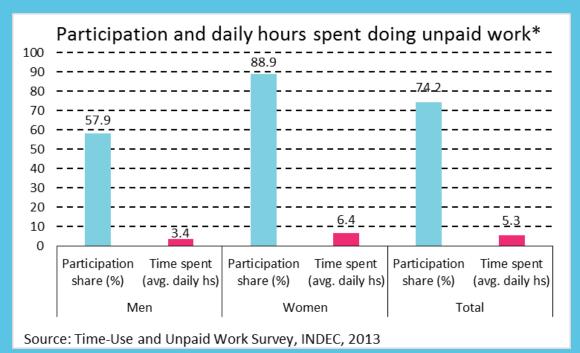

### **Proposals**

- Sexual and reproductive health: Raise awareness; Improve access to contraception; Enhance sexual education; and sexual violence and abuse prevention
- Maternal and infant wellbeing: expand services & linkage to transferences

# CIPPEC®

# Goal 5: Achieve gender equality and empower all women and girls

Significant gender gaps remain:

- Poverty: the other face of the infantilisation of poverty
- Labour market participation and performance
- Disproportionate burden of unpaid work\*

#### **Proposals:**

- Remove barriers (ie maternity and paternity leaves)
- Expande care services
- Fulfilment of Sexual and Reproductive Rights: She decides

## **Conclusion**

Guaranteeing SPFs as a prerequisite for SDGs realization

### Focus on "leaving no one behind":

- Needs to be translated into a focus of universalization with expansion of social policies.
- Focus on not creating dual regimes of social protection

 $\rightarrow$  Allow the progressive fulfilment of rights

Social protection floors for all, an useful framework for:

- Identifying gaps → Argentina: families with greater proportion of women and children
- Mutidimensional approach: fulfilment of several SDGs (+ SDG10 and 17). Requires minimum income insurance and strategies for (re)productive conciliation

## **Conclusion**

Guaranteeing SPFs as a prerequisite for SDGs realization

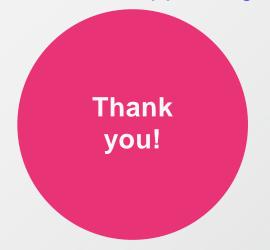

### Means for implementation (principles of R202):

- Coordination within government: sectors & levels
- Articulation with private sector and civil society (as partners, responsibility is on the States)
- Relevance of disaggregated data & integral systems of information
- Calls on progressive & sustainable structures for financing: relying on international cooperation solely at first. Mix of contributive and non-contributive sources.

→ Ultimate leads to building strong resilient societies & enabling fulfillment of human rights
